Income disclosure

Practicality dictates that everyone's results will vary as we are all unique and different. Basically, it takes hard work to make a substantial income in this business. Some people will make no money at all. The earnings of a Vyvo partner will be 100% dependent upon their skills, work effort, commitment, leadership capabilities, and market conditions.

Common sense would suggest that in most opportunities, one would find exceptional individuals performing well above average, while others perform under the average. Vyvo does not guarantee any level of income or your success.

The average participant in Vyvo earns less than \$500 per year. This does not account for any business expenses that one might incur while building the business.
