

VYVO WATCH LITE SE

VYVO LIFE WATCH

THE RIGHT NAME FOR A NEW
CATEGORY OF WEARABLE DEVICE.

WITH YOUR VYVO LIFE WATCH, YOU
CAN "LISTEN TO YOUR BODY'S VOICE"
AND GET A BETTER UNDERSTANDING
OF YOUR MAIN BIO-PARAMETERS.

A person with long hair, seen from behind, stands in a field of tall grass with their arms outstretched towards a bright, hazy sky. The image has a warm, golden-brown color overlay.

YOUR NEW VYVO LIFE WATCH

VYVO™

VYVO™ WATCH

LITE SE

Body Temperature

Your VYVO WATCH LITE SE is equipped with a new Texas Instrument high-precision medical grade digital temperature sensor, capable of providing a body temperature result with an accuracy of up to $\pm 0.1^{\circ}\text{C}$. This allows you to be constantly aware of your body temperature, which is an important indicator of your health and wellbeing.

SpO₂ Measurement

Using a sophisticated infrared (IR) and near-infrared (NIR) sensor that has been developed based on the PPG principle, your VYVO WATCH LITE SE provides results similar to a pulse oximeter but it can do this continuously. This smartwatch continuously measures your peripheral oxygen saturation (SpO₂) levels, making it possible to monitor changes in your blood oxygenation.

PROJECT
CEASE

VYVO™ Labs

COVID-19 Early Alert System Experiment

VYVO Labs' first public project is Project CEASE, an international research project established to better understand the early signs and spread of influenza, with specific focus on the novel coronavirus SARS-CoV-2, called COVID-19.

SOS and Guardian Alerts

Guardian Alerts notify you and your guardians if some of your key-bioparameters are outside their normal range, if it detects that you have fallen or you get into difficulty and it sends an SOS alert.

**PRODUCTION STARTED AT
THE FOXCONN FACILITY.**
